Top tips for your family

- Brush teeth at least twice a day, as soon as the very first tooth begins to appear!
- Brushing at bedtime each day is the most important time
- Ensure you use a fluoride toothpaste, with at least 1000ppm fluoride in the following quantities:

A smear for 0-3 years (or those who cannot spit out)

Pea sized blob for 3-6 year olds (or those who are able to spit out)

- When finished brushing don't rinse out with water just spit out the foam
- Keep sugary foods and drinks to mealtimes only

Information for parents and carers

Cambridgeshire Community Services NHS Trust: delivering excellence in dental care across Cambridgeshire, Peterborough and Suffolk

What is My Smile?

My Smile is a quality mark awarded to early years settings which fully implement the four My Smile steps to provide a tooth friendly environment for the children they care for.

My Smile includes daily supervised toothbrushing in your child's class.

The My Smile team provide supervised tooth brushing and cross infection control training to staff which will enable them to carry out daily supervised toothbrushing safely.

How will my child's setting work towards this accreditation?

1. Strengthen teeth

The children will brush their teeth in the setting once a day.*

*Consent forms will need to be signed for children to participate. This does not replace the usual twice daily brushing at home!

2. Provide a tooth-friendly diet

Snacks and drinks will be tooth friendly and celebration foods will have a savoury or non food focus.

3. Promote dental visits

Your child's setting will actively encourage families to visit the dentist regularly.

4. Share oral health information

Oral health training will be delivered to staff by the My Smile team as part of step four, this information will be shared by the setting with parents and carers to help promote good oral health at home.

How will my child and family benefit from My Smile?

- Better toothbrushing at home
- Willing to try more fruits and vegetables
- Building good toothbrushing skills
- Lessening the impact of sugar on the teeth
- Instilling good healthy habits
- You will be reminded of how important it is to visit the dentist regularly
- Extra toothbrushing with fluoride toothpaste to strengthen teeth
- Less likely to need dental treatment
